

ECOBATT
YOUR ENERGY
SOLUTIONS
IN CAMBODIA

A green environment starts with your actions...

THE GENESIS

Our humble company was created on a simple observation, the manual treatment of a fast growing number of old batteries were appalling and paused a major threat on the environment, and subsequently and indirectly on the health of its population, with short and long term effects.

Our first and prime mission was to help the country with its disposed lead battery, by offering a regeneration service. But this action could not solve the problem on its own, so, in 2020 we decided to expand our services to tackle more issues...

IN CAMBODIA**

A SPARKLING PARTNER

Let's make a commitment together to better our environment and power the future of Cambodia!

Ecobatt Energy Cambodia is proud to offer reliable and clean energy solutions for every industry in the Kingdom. Our eco-friendly power supplies ensure that we leave only a green footprint on the country, helping businesses move into a more sustainable future.

As your dedicated partner, Ecobatt is here to provide long-term support and knowledge to ensure you get the most out of clean energy solutions. We believe living in harmony with the environment can only be done with an integrated approach, which is why bringing sustainability into your business can be easy and affordable. With us as your trusted partner, you'll have peace of mind knowing we are actively working to reduce carbon footprints and improve our environment. Together, let's work towards building a healthier, greener tomorrow. Join us today in becoming an eco-leader!

WE STAND STRONG

MISSION

To protect our environment and public health, we are dedicated to eliminating battery obsolescence by creating a sustainable circular economy for industrial batteries.

VISION

We aim at educating and leading Cambodians to care for the environment without compromising the future of the next generation

**SOKCHEA
LEAN**

Chief Executive Officer

The background of the page features a repeating pattern of light gray recycling symbols (three arrows forming a triangle) and arrows pointing in various directions. These symbols are scattered across the left and top portions of the page, creating a subtle, eco-friendly aesthetic.

MESSAGE FROM THE CEO

We are a dependable recycling company, taking our commitment to environmental recycling extremely seriously. From batteries of all types, to electronic waste, we handle the proper collection and processing of any waste imaginable. We are making strides towards recycling tires in the near future in order to contribute to a healthier environment. Our passion for keeping our planet clean and safe continues to drive us as we strive to stay on top of the latest recycling initiatives and technologies. Offering our recycling services allows us to contribute positively to society and serve as an example for others who wish to make a difference in their own communities.

THIS IS NOT THE END OF IT

Our battery reconditioning process is not invasive, does not use chemicals additives and is completely electronic. We use a frequency pulse to break down sulfate crystals that build up along the plates over time.

Our process transforms these crystals back to active material allowing electrons to flow freely through the plates again. A reconditioned battery can last for more than two years and in many cases the process can be repeated. Our regeneration machines can deliver up to 150 electric pulse per second to breakdown the sulfate crystals forming along the plates and transforming them back to active material. We use our powerful tool to maintain your batteries at top performance and deliver our first 2R's added values: Reduce & Reuse.
